CHOOSE A CAREER LEADING TO A PG DEGREE IN USA

DID YOU KNOW ?

- Students earn anywhere around 150,000 US\$ to 300,000 US\$ after residency
- No MCI screening test
- In counties like India students either need to be in the top 5% bracket to secure admission in PG or shell out Crores of rupees in donation
- In 2019, 59% IMGs who applied for residency got residency position in USA.
- In case you do not get a residency position in the first attempt, you can always take up a teaching job or a research job in USA or St. Lucia or any other Caribbean medical school wherein you could earn around 3500 US\$ to 6000 US\$ per month. You can always apply for residency again after a year when your resume would be stronger as a result of your teaching job
- Spartan is the only college in St. Lucia and one of the seven colleges in the entire Caribbean to have the prestigious CAAM HP accreditation. And, Spartan is one of the very few colleges that offer ACGME Green Book Clinical Rotations in USA.
- Zordha Education is elated to offer its own food and hostel option in St. Lucia. We have sent a North Indian cook & a South Indian cook who cook Pure Veg & Non Veg North Indian & South Indian delicacies
- All the rooms in the Zordha Hostels are fully furnished with facilities like Modular Kitchen with appliances & dishes, TV, Refrigerator, Oven, Cable, Internet, Cleaning Lady, Laundry Service, Bed Linens, etc.
- Zordha Education offers 100% guaranteed Admission process for Spartan Health Science University
- PG or residency in addition to being completely free would enable students to recover all the money they spent on MD degree within a span of 1.5 years while doing PG
- Students who have completed residency in USA do not need to appear for MCI screening test and neither do they need to undergo 1 year internship. They can get registration directly from MCI as PG doctors in India.
- In USA, every year around 30,000 to 35,000 IMGs(International Medical Graduates),i.e., students who haven't done MD(MBBS) from USA apply for residency position(PG) in USA. Of these 30,000 to 35,000 students who apply, 17,000 do get residency position in USA. Again, most of the IMG students who get residency position have studied from Caribbean Medical School. This is because they have US Clinical experience.
- Spartan Health Science University is one of the oldest and the best Caribbean Medical Schools with strong Alumni of more than 2400 successful doctors in prominent positions across the globe which helps its graduates with a great sense of pride. If the USMLE performance of the students is above average they are more or less certain to get a residency position in USA. You just need to be in the top 45% bracket to do PG in USA as opposed to being in the top 5% bracket in India.
- There is a difference between ACGME Approved Green Book Clinical Rotations & Observership. Some Caribbean Medical schools play with the life of students by offering cheap observership. Observership is not valid in USA or anywhere else in the world. Students won't be able to do residency in USA. So beware !!
- According to Census of Actively Licensed Physicians in the United States, 2014. 25% of all doctors in USA are IMGs which means 1 in every 4th doctor is IMG.
- According to American Association of Medical Colleges, there will be a shortage of 125,000 Doctors by 2025. Healthcare reform will increase this shortfall by another 25 percent.
